# Yueh-Po Peng

Machine Learning Engineer

## About Me

I am a Senior Machine Learning Engineer at Gamania Digital Entertainment. Previously, I was a Visiting Researcher at Sony Computer Science Laboratories. I specialize in developing AI-driven solutions across various domains including computer vision, natural language processing, and medical imaging.

With a Master's degree in Data Science from National Taiwan University, I have presented research at conferences such as ICASSP, ISMIR, and DAFx. My work focuses on applying machine learning to solve real-world problems, from audio processing and medical image analysis to financial anomaly detection.

## What I Do

### Machine Learning & Deep Learning

Developing advanced AI models for computer vision, NLP, and audio processing applications.

### Medical Imaging & FMRI Analysis

Applying self-supervised learning techniques to decode brain signals and analyze medical images.

### ♫ Audio Processing & MIR

Music information retrieval and audio effect processing using deep learning methods.

### 〰 Data Science & Analytics

Building data-driven solutions including Text-to-SQL agents and anomaly detection systems.
